Basic Facts about the Ohio Statewide ESRI Site License Program

In the explanation of the terms of the site license program given below, the benefits available to institutions are sometimes differentiated acording to whether or not the institution is a four year school and has more than 10,000 FTE. This class of schools receives some additional benefits not available to smaller schools.

What software does the program include?

This Agreement provides the right to copy and use the following software programs and data sets:

- ARC/INFO®
- ARC NETWORK™
- ARC TIN™
- ARC COGO™
- ARC GRID™
- ArcScan™
- ArcExpress™
- ArcPress™
- ArcPress for ArcView
- ArcStorm™
- PC ARC/INFO®
- NetEngine™
- ArcView 3D Analyst™
- ARC/INFO ODE
- ArcCAD®
- ArcView® GIS
- ArcView Network Analyst
- ArcView Spatial Analyst
- ArcView StreetMap™
- MapObjects®
- ArcUSA™
- ArcWorld™ Arc Atlas
- ArcScene™
- Digital Chart of the World (DCW)
- *Business*MAP™ PRO
- Atlas GIS™
- ArcView Internet Map Server
- MapObjects Internet Map Server
- U.S. Streets Database

✓ Universal Data Package Lab Kit

How is the software distributed?

➤ 10,000 FTE Four Year Schools

At the time they begin participation Institutions which are larger than 10,000 FTE have the opportunity to select a set of initial deliverables, i.e. copies of the software listed above, which will be sent to their institution directly. After that point, new releases and updated versions of the software will be sent to the institution as long as it continues to participate in the site license program.

< 10,000 FTE Four-Year Schools and Two-Year Schools

For two-year schools and four-year institutions with less than 10,000 FTE, copies of the software needed must be obtained from one of the OhioGISNet schools, or

a copy of the software on CD-ROM or diskette media may be bought directly from ESRI. at a university discount rate

How is technical support provided?

➢ 10,000 FTE Four Year Schools

Four year institutions with more than 10,000 FTE who participate will automatically receive two technical support contacts with ESRI. These are two individuals who can contact ESRI to obtain technical support services.

< 10,000 FTE Four-Year Schools and Two-Year Schools

Other schools may designate two individuals who can contact the GIS Specialists at OhioGISNet schools[1] for technical assistance and training. Successful implementation of the ESRI software requires the appointment and development of a person(s) who can provide technical support to the campus. These individuals can work with OhioGISNet to answer questions that they are not able to answer. Alternatively, schools can also purchase additional technical support contracts from ESRI. These cost $1,000 per year for one contact.

What will it cost me to participate?

➢ 10,000 FTE Four-Year Schools

For four year institutions, the cost of participation is $0.49/FTE per year.

< 10,000 FTE and Two-Year Schools

For technical and community colleges, the cost per FTE is half the four year rate, or about $0.25/FTE per year.

For All Schools

There can be additional costs for an institution if that institution also chooses to buy technical support services or copies of software media and documentation. The contract year runs from July 1 to June 30. Institutions can join any time during the year and the cost will be prorated. Payment for the annual participation fee is made to OhioLINK. Additional copies of software media or documentation are purchased directly from ESRI.

Who can participate?

Any OhioLINK full or participating member institution can participate.

Who can use the software and where?

Faculty, students, staff, and administrators of the institution may use the software. The software may be used off campus by faculty members, but students may only use the software on campus.

Are there other important responsibilities taken on by the institution who participates in this site license?

Record Keeping - Each participating institution is responsible for maintaining records of the distribution of ESRI software on its campus. The institution must keep track of what software is installed and where. The inventory number, host name, or serial number of the computer must be noted.

Monitoring Software Use - The institution is reponsible for ensuring that members of the campus are following the terms and conditions of the site license. The institution is responsible for ensuring that all copies of the ESRI software on its campus are destroyed if the site license is terminated and the institution does not enter into a new site license agreement with ESRI after termination of the OhioLINK license program.
