Helpful Hints from the Sociology TAG Panel

1. Use clear verbiage that the learning outcomes had been adequately addressed in writing.
   - Institutions not succeeding on the first pass often made the panel members 'dig' for evidence that the outcomes were being addressed. Despite our best efforts, such evidence could not be found in those cases. In contrast, those with greatest success were the ones that specifically mentioned the learning outcomes in their syllabi virtually word-for-word as specified by the TAG.

2. The Sociology panel group did not turn any submissions down if the essentials and the 70% rule were met.
