Faculty Staff open session meeting summary

In this session we reviewed the new annualized salary fields that were added to the Faculty Demographics (FD) and All Employee (AM) files. This field will enable us to better understand the average salaries of higher education employees by work category. Participants were directed to the new "case law" page which provides examples on how to report the annualized salary fields in the FD and AM files. Data reporters can link to this page from within the AM and FD data submissions documents (in the annualized salary definition), or go directly to the page at:

<http://www.regents.state.oh.us/hei/datasubdoc/faculty/production/faccaselaw.html>

We also reviewed the results of the full-time faculty survey that the Ohio Board of Regents conducted last year. This biennial survey is, in part, the replacement of the OBR Faculty Service Report that was conducted twice per year in previous years. The stratified random survey is designed to describe the activities and contributions of part-time faculty on a statewide basis. A sampling strategy of part-time faculty once per year will make data collection on campuses less burdensome than a total census strategy twice per year. Results of the survey are available on the Web at:
