

Financial Aid Open Discussion
2001 HEI Users Conference
March 23, 2001

Most of those attending this session were returning from the morning's training for new financial aid users. The initial portion of the hour was spent on further review and clarification of current HEI submissions for SGS programs.

Next, OBR staff provided updates on new developments. The current work is "behind the scenes" conversion of the Instructional Grant administrative and accounting processes from the legacy system. We are also working on an interface with the 960 high schools that participate in the Ohio Academic Scholarship.

In general, those school representatives with some previous experience with HEI expressed an overall satisfaction and an interest in HEI's converting the remaining SGS programs as soon as possible.
