

Employment Outcomes for Graduates

Questions: Are graduates from Ohio's state-supported and independent colleges and universities employed in Ohio subsequent to graduation? What are the average earnings of full-time graduates, 0.5, 1.5, and 2.5 years after graduation? Do employment rates and average earnings vary by degree level, discipline, type of college, or institution?

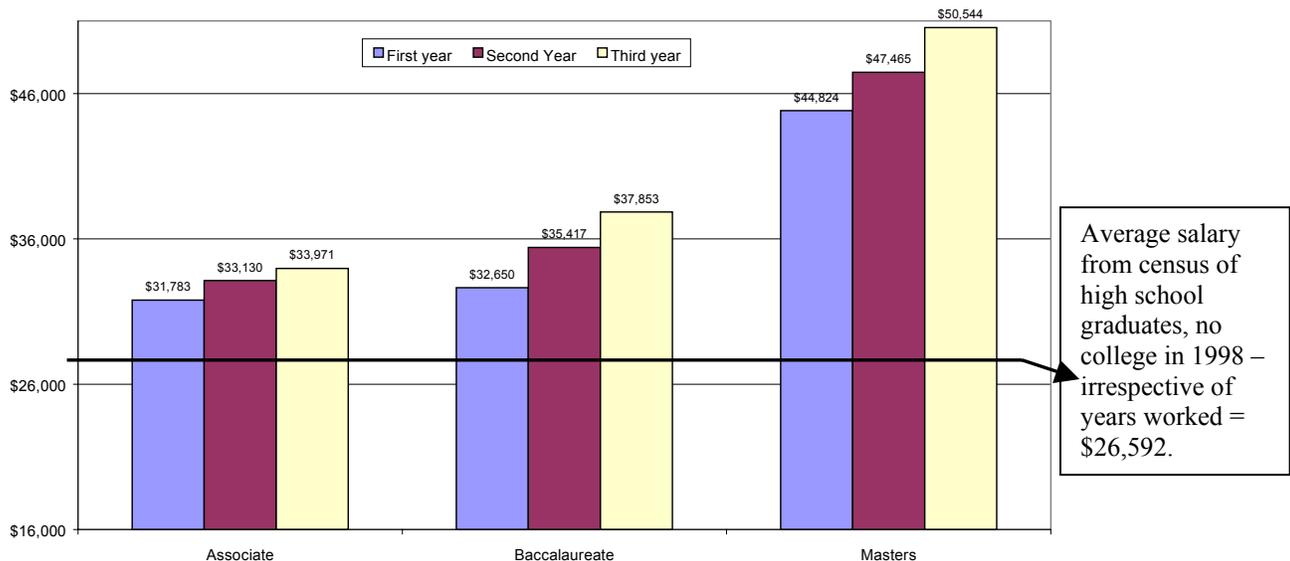

Why ask about the employment of graduates? Students enroll in higher education for many reasons. Some enroll for the enjoyment of learning. Others enroll while they are employed with no intention of changing jobs and possibly little expectation of salary increases. Generally, though, the majority of students who enroll in college have an expectation that they will be employed. Further, graduates have an expectation that their salaries will grow as time goes on or as they progress in degree efforts from associate degrees to baccalaureate degrees to masters degrees or professional degrees, and then finally to doctoral degrees.

Note: To answer these questions, the graduating classes of spring 1998, spring 1999, and spring 2000 were cross-matched against the employment database maintained by the Ohio Department of Jobs and Family Services. This cross-match was to determine if graduates were employed within the state of Ohio in the fourth quarter of the year following their spring graduation and to calculate their annualized incomes based upon their quarterly salary. There are four known limitations of these data: 1) The data matching process does not reflect income received by an owner of a small company, although the data matching is successful for any employee of the small company who is paid wages. 2) The data matching process does not reflect employment on federal payroll in such installations as Wright-Patterson AFB, NASA Lewis, the Defense Supply Center in Columbus, and EPA in Cincinnati. 3) To make a distinction between part-time and full-time work, we have used an annualized salary of \$16,000 or more to indicate full-time salary. 4) We are unable, with these data, to differentiate between the salaries of graduates who were working for an employer prior to graduation from those of graduates who began employment with a particular employer after graduation.

National Answers: Complete national census data on educational attainment and income will not be available until Summer, 2002. Updates to this report will be provided when these data become available

- Seventy-two percent (72%) of graduates were either known to be employed in Ohio or continuing their schooling in Ohio in the year after graduation.
- In-state associate degree graduates were most likely to be employed in-state, whereas graduate and professional degree recipients (including both in-state and out-of-state students) were less likely to be employed in-state following graduation.
- When considering the salaries of graduates, the age of students upon graduation is related to graduates' salaries. At all degree levels, students older than 24 years of age show higher salaries than their younger peers.

Annualized Salaries of College Graduates, 1998, 1999, 2000 Graduates: First-year, Second-Year, Third-year Following Graduation

Employment and Schooling Outcomes for 1998, 1999, and 2000 Spring Graduates 0.5 years Following their Graduation

Type of Degree	Known In-state Employment	Either known In-state Employment or known continuing school	No known In-state Job and no known return to school
Associate Degrees-Public (In-state students)	79%	84%	16%
Baccalaureate Degree-Public (In-state students)	68%	72%	28%
Baccalaureate Degree-Independent (In-state students)	72%	76%	24%
Masters Degree-Public (In-state and out-of-state students)	55%	60%	41%
Doctoral-Public (In-state and out-of-state students)	36%	37%	63%
Professional-Public (In-state and out-of-state students)	48%	48%	52%
Total	68%	72%	28%

Annualized Full-Time Salaries of State-Supported College and University 1998, 1999, and 2000 Spring Graduates 0.5, 1.5, and 2.5 years Following Graduation

Graduate's Age Upon Graduation						
Degree Level	< 24 years			24+ years		
Associate	31% of all associate graduates			69% of all associate graduates		
Baccalaureate	52% of all baccalaureate graduates			48% of all baccalaureate graduates		
Degree Level	First year	Second Year	Third year	First year	Second Year	Third year
Associate	\$27,202	\$28,757	\$30,547	\$33,785	\$35,100	\$35,553
Baccalaureate	\$31,477	\$34,354	\$37,288	\$35,159	\$37,476	\$39,743

Annualized Salaries of Student Choice Grant Recipients at Independent Colleges: In-State, Full-Time Baccalaureate College Students – Assumed to be < 24 years old at Time of Graduation: First, Second, and Third Year after Graduation

Degree Level	First year	Second Year	Third year
Baccalaureate	\$31,505	\$33,772	\$36,674

Annualized Salaries of All College Graduates – Irrespective of Age at Time of Graduation: First, Second, and Third Year after Graduation

Degree Level	First Year	Second Year	Third Year
Associate	\$31,783	\$33,130	\$33,971
Baccalaureate	\$32,650	\$35,417	\$37,853
Masters	\$44,824	\$47,465	\$50,544
