Subject: Replacement of ATH 241 with ATH 2100 for OSS002 (Physical/Biological Anthropology)

ATH2100 (Introduction to Biological Anthropology, 3 semester hours) remains essentially the same course as ATH 241 (Introduction to Biological Anthropology, 4 quarter hours), which was approved for OSS002. ATH 2100 continues to meet the learning outcomes identified for this class. As the attached syllabi show, the semester format allows us to provide a bit more coverage for modern evolutionary adaptations and a more recent edition of the textbook will be adopted, but there are no significant changes.
