Description

This report provides employment outcomes of graduates and certificate completers by program, as identified in ODHE's Higher Education Information System (HEI). The report includes a list of programs by Classification of Instructional Programs (CIP) code, separately for each level of degree or certificate and each campus (for four-year universities). We report graduates and certificate completers who finish during the terms summer 2008 through spring 2013, along with the number found working in Ohio both two and four calendar quarters after the date of graduation or completion, as well as median quarterly earnings.

Methods

Individual graduates and certificate completers were identified through HEI. HEI provides the level of degree, a term of graduation, and the subject of the degree (by CIP code). In addition, for all four-year schools (except Ohio State), HEI provides the campus from which the individual graduated as well. Using these variables we identified the individuals graduating or completing a certificate, by level, by subject, by campus. An individual may appear in more than one category. For example, if an individual earned a bachelor's degree in both math and biology, the person would add to the number of graduates in both groups. However, an individual will only be counted one time in each category. For example, if the individual earns two certificates in welding at the same campus, the person would only be counted once. If a person earns multiple degrees or certificates, earnings are calculated two and four quarters after the most recent degree or certificate earned between summer 2008 and spring 2013.

The earnings of individual graduates and completers was identified by matching the individuals identified in HEI with administrative records from the Unemployment Insurance (UI) system. The Ohio Department of Job and Family Services collect quarterly earnings from all employers in Ohio who are required to report to the UI system. As a result, the UI wage data include only those individuals working in Ohio who are neither Federal employees nor self-employed; those groups of individuals do not pay into Ohio's unemployment insurance system, and thus are not captured by the UI administrative data. For reference, in Ohio in 2010 about 1.5% of workers were Federal employees, and about 5% of workers were self-employed.¹ Earnings are reported as a median, to avoid skewing high due to one high earner. In addition, zero earnings are not included in calculating the median because zero earnings indicates that the individual is not employed in Ohio.

OERC reports outcomes only for those groups with 10 or more individuals, to avoid re-identification of any particular individual. In addition, there are some combinations of campus, level, and subject that have fewer than 10 graduates, even over five years. For those programs, we report "other" graduates at each level on each campus, with a list of those programs included in the "other" category. In cases where the "other" grouping still has fewer than 10 individuals, the data is replaced by "****".
